

General Fabrication

GFV is already recognised as a leading supplier and manufacturer of specialist commercial kitchen and ventilation systems.

In recent months GFV has extended its services to include fabrication of specialist stainless steel metal works to new market sectors such as bespoke panels for passenger lifts, complete cabinets and even boot /shoe racks for abattoirs, thus demonstrating the diverse range of our manufacturing capabilities.

We have also made significant investment in new plant/equipment for services that include:

- Stainless steel fabrications.
- CNC punching.
- Shearing, guillotining and bending.
- MIG/TIG welding.
- Turnkey design facilities with the support of a dedicated CAD team.
- On site installation team of experienced fitters.

So whether you require the smallest, simplest piece of sheet metal or the most complicated precision fabrication, GFV is the company capable of meeting your requirements, with prices that are competitive and deliveries tailored to suit your schedule.
