

Ventilation & Extraction

GFV offers a complete design and consultancy service for all kitchen ventilation and extraction systems. Our bespoke design service covers all aspects of the project from initial contact and survey to professionally produced drawings using the latest software.

Kitchen Ventilation Installation - Quality Standards

All our Installations comply with HVCA DW172 and HVCA DW144.

The GFV Service and Team

Our services include specification, design, manufacture and installation of complete ventilation systems. All aspects of the design will be administered by a dedicated project manager.

GFV project managers survey projects nationwide, from initial survey to production of costings and drawings, depending on the complexity of the project, is just a matter of days. We will co-ordinate all installation issues with the site to ensure programmes of works are met enabling our customers to complete successful project implementations. Our in-house staff have years of experience in the production of high quality products, and for custom designs they offer a practical solution to difficult design issues. Our installation teams comprise of 4 pairs of dedicated ventilation installation engineers, two electrical installation teams and dedicated fabrication installers.

Extraction and Ventilation System - Deep Cleaning

GFV recommends that your extraction and ventilation system is cleaned on a regular basis. The period between cleaning can be annually for light use and up to 3 monthly for more heavily used systems.

GFV uses a team of highly trained cleaners to undertake deep cleaning activities. These skilled operators are able to install access panels in your system ensuring all areas of the system are thoroughly cleaned. Using industrial and antibacterial degreasing agents, our teams will undertake cleaning activities when it is most convenient for you. Working around opening times and system use, cleaning can be undertaken overnight or early in the morning. On completion a certificate of cleanliness will be issued for your records.

Additional Products and services

- Air Input and Replenishment
- Gas Interlock Systems
- Odour Control
- Carbon Filter Systems
- Silencers and Noise Control
- Replacement Filters
- Replacement Fans
- Ventilation Cleaning
- Stainless Steel Wall Cladding
- Hygienic Plastic Wall Cladding
- Kitchen Fabrication
