

Wall Cladding & Shelving

GFV offer two varieties of wall cladding, stainless steel wall cladding and UPVC wall cladding.

Stainless Steel Wall Cladding

Stainless steel wall cladding is ideal for areas which are directly subject to high temperatures, for example behind cooking ranges and under extract canopies. It is very easy to clean and fully EHO compliant. Stainless steel sheeting can be tailored to suit most cooking areas including cut-outs for sockets.

All stainless steel wall cladding is installed with cover strips and edge protection as standard.

UPVC Wall Cladding

UPVC wall cladding is food grade, fire resistant, hygienic and easy to clean. The UPVC sheets are finished with joining strips and end caps to ensure a sealed and protected range of cladding.

Shelving

Whatever your shelving needs, GFV has the solution. GFV can supply and install all types of shelving including industrial shelving, catering shelving, healthcare shelving, coldroom shelving, display shelving, wine racks, freezer racks and wire shelving.

Trolleys

Stainless steel, cafeteria clearing trolleys, preparation trolleys, wire trolleys for stock or baskets, plastic and aluminium bespoke trolleys.

Plate Mate

A range of sizes from table top to floor standing plate storage stands are available. Designed to minimise the space required for storing pre-prepared cold starters or desserts. Easily and quickly adjusted to accommodate plates and bowls up to 50mm. The ideal space saving solution.

Additional Products and services
